

Giosuè Palliotto

Data engineer in Health

Contact

Phone
+39 320 311 7900

Email
giosupalliotto@gmail.com

Address
Nordvej, Kongens Lyngby 2800

Soft Skills

Analytical Thinking
Creativity
Decision making
Critical Thinking
Stress management
Adaptability
Learning Agility

Language

Italian - Native
English - C1

Hobbies

RC aircraft and drones:

- **Assembly**
- **Configuration**
- **Flight testing**

Awards

Regional Merit-Based Scholarship
2022-2025, at the University of Padua.

T.I.M.E. Excellence Scholarship
2025-2027, double-degree program

Biomedical Engineering Master's student pursuing a **double master degree** in **Bioinformatics** between the University of Padua in Italy and the Technical University of Denmark through the T.I.M.E. program.

Specialized in data analysis and visualization, modeling, signal processing, and bioinformatics, with experience transforming complex datasets into interactive dashboards using **Python, R,** and **MATLAB**. Interested in applying data-driven approaches to real-world technological and infrastructure challenges.

Education

2025–Present	MSc Bioinformatics	Technical University of Denmark
2024–Present	MSc Bioengineering for Neuroscience	University of Padua
2021–2024	BSc Biomedical Engineering	University of Padua

Technical Skills

Programming:	Python R MATLAB	Data Science:	Data preprocessing Data visualization Statistical modeling Machine learning Signal processing
Tools:	Git/GitHub SolidWorks Fusion360 SQLite Microsoft Office	Engineering:	3D printing Laser cutting Rapid prototyping

Projects & Academic Experience

Biomedical Data Analysis	Built pipelines and dashboards for biomedical datasets; applied spectral and image analysis, compression, visualization
Metagenomics Analysis	Experience with NGS and WGS workflows and high-dimensional biological datasets
Visualization of patients data for ICU	Rigshospitalet, Copenhagen: worked on innovating ICU data visualization and usability for information-support
Hackathons & Innovation Workshops	Developed data-driven solutions in multidisciplinary teams in multiple competitions
