

Giosuè Palliotto

BIOMEDICAL ENGINEERING & BIOINFORMATICS MSc STUDENT | COPENHAGEN

✉ giosupalliotto@gmail.com | 📱 pi-cco | 🌐 giosue-palliotto

Data Analysis | Machine Learning | Biomedical R&D | Innovation

Summary

Master's student in Bioengineering and Bioinformatics, double degree between the University of Padua and DTU. Formal academic training in MATLAB, Python, R, machine learning, signal and image processing, and bioinformatics. Independently learned 3D CAD with Fusion 360 and rapid prototyping. Recent extracurricular activities include creating a recommendation algorithm for a Hackathon, the 3 day "Open Innovation: Health" workshop organized by DTU Skylab and a two day hands-on workshop organized by TUH MedTech on innovation in bioengineering. The reason I took part in those events is because I love to learn by doing and meet multidisciplinary teams to experience different viewpoints. Currently at the beginning of my third semester, seeking a student job and then a technical role in Denmark after graduation. Full portfolio of projects available at: pi-cco.github.io

Education

Danmarks Tekniske Universitet - DTU

MSC IN BIOINFORMATICS (T.I.M.E. DOUBLE DEGREE PROGRAM)

Kongens Lyngby, Denmark

Sep. 2025 - Present

Università degli Studi di Padova - UNIPD

MSC IN BIOENGINEERING – NEUROSCIENCE CURRICULUM (T.I.M.E. DOUBLE DEGREE PROGRAM)

Padua, Italy

Sep. 2024 - Present

Università degli Studi di Padova - UNIPD

BSc IN BIOMEDICAL ENGINEERING

Padua, Italy

Sep. 2021 - June 2024

Work Experience

Da Basso

HEAD WAITER

Lyngby, Denmark

Mar. 2026 - May 2026

- Independently managed daily restaurant operations for a 20-seat restaurant and takeaway service, regularly working alone in my position.
- Handled opening and closing procedures, customer service, reservations, payments, and day-to-day operational issues.
- Coordinated with other employees and managed customer requests in a fast-paced environment while maintaining service quality.

La Fattoria di Virum

CHEF ASSISTANT

Virum, Denmark

Aug. 2026 - Present

- Prepare and finish pizzas, including cooking, topping, cutting, and presentation.
- Handle takeaway orders and customer service in a fast-paced restaurant environment.

Volunteer Activity Leader

PATRONATO PIO X

Cittadella, Italy

2018 - 2023

- Organized activities and supervised groups of approximately 20 primary and middle school children during annual summer programmes.
- Coordinated with other activity leaders and regularly took responsibility for a team of volunteers.

Selected projects

Biomedical Data Analysis

UNIVERSITY OF PADUA

Padua, Italy

- Developed Python and R pipelines for processing and analysing real biomedical datasets, including physiological signals, medical images, cancer and diabetes data.
- Applied signal and image processing, segmentation, statistical modelling, clustering and machine learning to extract meaningful patterns from complex datasets.
- Built visualizations, dashboards and web-based tools to communicate results and apply data analysis methods to practical biomedical problems.

Patient Data Visualization

RIGSHOSPITALET

Copenhagen, Denmark

May 2026

- Investigated how patient information is transferred between physicians and subsequent caregivers, focusing on improving usability and information flow.
- Observed existing workflows and interviewed nurses and healthcare professionals to identify problems in how patient data was organized and communicated.
- Developed a prototype for improved information visualization, including AI-assisted design and ideation.

AUGUST 13, 2026

GIOSUÈ PALLIOTTO

Spotify Recommendation System

Kongens Lyngby, Denmark

HACKATON AT DTU SKYLAB

Nov 2025

- Developed a recommendation algorithm in a multidisciplinary team using Python and R on a dataset containing millions of song records and audio features.
- Applied cosine similarity and k-nearest neighbours to identify and recommend similar songs, combining provided metadata with computed features.
- Presented the team’s solution and received positive recognition during the challenge.

RC Aircraft Design and Manufacturing

Padua, Italy

LIFT UP - UNIVERSITY OF PADUA

2024 - 2025

- Designed and manufactured the fuselage and cargo bay of a fixed-wing aircraft as part of a multidisciplinary student team.
- Worked with carbon fibre, fiberglass, epoxy moulds, prepreg and dry-fibre composites, including lamination and resin infusion.
- Participated in flight testing and contributed to an aircraft that placed 10th in the 2024 and 5th in the 2026 Air Cargo Challenge.

Technical Skills

Programming Python R MATLAB SQL Git/GitHub
Tools Signal and Image Processing Biomedical Imaging analysis Physiological Modelling
Engineering SolidWorks Fusion 360 3D Printing Laser Cutting Fast Prototyping
