

Giosuè Palliotto

MSC STUDENT AND ENGINEER - COPENHAGEN

✉ giosupalliotto@gmail.com | 📷 pi-cco | 🌐 giosue-palliotto

Biomedical Engineering Master's student pursuing a **double degree** in Bioinformatics between the University of Padua in Italy and DTU through the T.I.M.E. program.

Education

Danmarks Tekniske Universitet - DTU

MSC IN BIOINFORMATICS (T.I.M.E. DOUBLE DEGREE PROGRAM)

Kongens Lyngby, Denmark

Sep. 2025 - Present

Università degli Studi di Padova - UNIPD

MSC IN BIOMEDICAL ENGINEERING FOR NEUROSCIENCE (T.I.M.E. DOUBLE DEGREE PROGRAM)

Padua, Italy

Sep. 2024 - Present

Università degli Studi di Padova - UNIPD

BSC IN BIOMEDICAL ENGINEERING

Padua, Italy

Sep. 2021 - June 2024

Projects and experience

Denmark - Italy

BIOMEDICAL DATA ANALYSIS

- Built pipelines, HTML website and dashboards for biomedical and social datasets
- applied spectral and image analysis, compression, machine-learning, visualization techniques

Denmark

HACKATHONS AND INNOVATION WORKSHOPS

- Developed recommendation algorithm for Spotify.
- Worked in multi-day engineering challenges with multidisciplinary teams.

Rigshospitalet - Denmark

VISUALIZATION OF PATIENTS DATA

- Special course: worked on innovating data visualization and usability for information support

Denmark

METAGENOMICS ANALYSIS

- Experience with NGS and WGS workflows and high-dimensional biological datasets

Skills

Programming & Web

Python, R, MATLAB, SQL, HTML, CSS, Git/GitHub, LLM

3D modeling

SolidWorks, Fusion360, Bambu studio/Cura, Lightburn

Data Science

Data preprocessing, Data visualization, Statistical modeling, Machine learning, Signal processing, Image processing, Computer vision

Engineering

3D printing, Laser cutting, Fast prototyping

Soft skills

Analytical Thinking, Creativity, Decision making, Critical Thinking, Stress management, Adaptability, Learning Agility

Languages

Italian Native

English C1 level

Summary

I am a Biomedical Engineering Master's student from Italy, currently pursuing a double degree in Bioengineering and Bioinformatics between the University of Padua and DTU. My technical background includes programming, signal processing, machine learning, statistical modeling, image processing, and bioinformatics workflows. I also have hands-on experience with 3D printing, CAD software, and drone piloting. I consider myself open-minded and adaptable. I enjoy learning new things and working with people from different backgrounds. While I am passionate about healthcare and data science, I am also happy to work in contexts that are not 100% aligned with my academic path. Whether it involves creative prototyping, interdisciplinary problem-solving, or completely new challenges, I am motivated to bring my analytical mindset, curiosity, and practical skills to any team that values innovation and collaboration.
